Site Civil Land Development and Design Consulting

We're consultants for commercial and residential land development projects. We bring a keen eye to consultation in design, construction, maintenance, inspection, and repair, and take pride in providing excellent value and responsive service to clients.

Underfoot can take your land development projects to the finish line by helping you navigate the development process from site evaluation through construction. With professional experience in site design and development, subdivision planning, transportation, grading and erosion control, utility design, and stormwater control measures, we help bring client projects to reality.
